

MDX-S ON DEMAND

The MDX-S On Demand has kept the same features of the previous grinders, but stands out for its quietness thanks to silent block motor technology, along with a new ventilation system. 65mm stainless steel burrs offer a consistent grind profile, while an adjustable portafilter fork guarantees a high quality grinding experience.

Perfect for low volume sites, or ideal as a decaf or single origin grinder, the MDX-S will fit into any situation and enhance your coffee offering.
