

MDJ ON DEMAND

MDJ On Demand is a professional coffee grinder guaranteeing quality performance for high volume coffee shops. The MDJ features a new system for arranging the motor inside the bodywork, based on the use of special shock-absorbers that isolate the motor, resulting in lower noise emissions.

Large 75mm steel burrs and stepless grind adjustment offer full control over the quality of ground coffee, and a portafilter holder offers increased efficiency on bar. An electronic display makes setting and controlling the grinder simple and intuitive. With a unique clump crusher and moveable chute, coffee always arrives in the portafilter free of clumps.

DIMENSIONS

215mm width
605mm height
